

Infrastructure Analyst

Program Length

52 weeks

Program Objectives

NetSoft's Infrastructure Analyst Program trains students in administering, implementing and supporting Microsoft, Citrix, VMware, Cisco and Linux products. NetSoft's courses provide students with the building blocks required to efficiently manage and support Windows Servers, Microsoft Azure, Microsoft Active Directory, Microsoft SQL, Microsoft Exchange, Microsoft ECM, Microsoft Intune, Microsoft Office 365, Citrix XenApp, Citrix XenDesktop, VMware vSphere, Cisco routers, Red Hat Linux, Ansible and ITIL. This program enables students to gain the proficiency needed to harness the power of these products.

Duration and Schedule

The program consists of 24 hours per week for 52 weeks.

Grading System

Students who successfully complete the program and pass the final exam will receive a diploma approved by the Ministry of Training, Colleges and Universities. The diploma will be awarded based on the following criteria:

- 1 The student must pass each course with a minimum grade of 60 per cent and meet all standards related to contact hours.
- 2 The student must maintain a satisfactory attendance rate of at least 80 per cent.
- 3 The student must not have any outstanding fees.
